AWARENESS ON SDG'S AND ADOPTING SDG'S IN REAL LIFE 'PLASTIC FREE JUNE'

AVOID SINGLE USE PLASTICS IN LUNCH BOX

Dubai Can is a sustainability initiative by His Highness Sheikh Hamdan bin Mohammed bin Rashid Al Maktoum, Dubai Crown Prince and Chairman of The Executive Council of Dubai. The initiative aims to reduce single-use plastic water bottle waste in the city by: Encouraging individuals to use refillable water bottles. In addition to this the United Arab Emirates has made a historic commitment to the environment with its decision to implement a nationwide plastic ban in 2024, specifically targeting **single-use plastics**. The initiative aims to protect marine environments, promote sustainable practices, and combat the increasing pollution levels attributed to plastic waste.

Target is set to reduce single use plastic at school and include parent community in this Awareness Campaign to save the marine life and to reduce landfills. Parents are advised to avoid single use plastic usage in lunch boxes as they aren't good for your ward's health. Following the health and safety of our students the use **of single use plastics won't be allowed hereafter** inside the school campus.

Our students conducted a Parents' survey on 8th June during the Open House. It was very successful due to active participation of parents. We thank each and every parent who took time to complete the survey and encouraged our students towards their learning experience.

The parent survey link and QR code is attached below for the parents who have not participated in the survey yet. You are requested to complete the survey using the link.
